BUTT HINGES AND HASPS

BUTT HINGE ORDERING INFORMATION

Consider the following **6** basics:

- A** Material of door and frame.
- B** Size, thickness and weight of door with all hardware accessories.
- C** Clearance required.
- D** Location-- exterior or interior.
- E** Frequency of use, door openings.
- F** Exposure (sea air, dust, corrosive atmosphere, etc.)

Thickness (inches)	Width of Doors (inches)	Height of Hinges (inches)
Doors		
3/4 to 1-1/8 cabinet	to 24	2-1/2
7/8 and 1-1/8 screen or combination	to 36	3
1-3/8"	to 32	3-1/2 to 4
	over 32	4 to 4-1/2
1-3/4	to 36	*4-1/2
	over 36 to 48	*5
	over 48	*6
2, 2-1/4, and 2-1/2	to 42	5 [heavy weight]
	over 42	6 [heavy weight]
Transoms		
1-1/4" and 1-3/8"		3
1-3/4		3-1/2
2, 2-1/4, and 2-1/2		4

Hinge Height

Determined by the width and thickness of the door. Height of hinge is always first dimension, not including tips. ****Heavy weight hinges should be specified for heavy doors and for doors where high frequency service is expected. The heavy weight hinges should be of 4-1/2", 5" and 6" sizes as shown in the table.**

Hinge Width

Determined by thickness of door and clearance required. If result is not standard width use next larger standard hinge width.

Formula for Hinge Width:

Factors: [1] door thickness [2] backset
 [3] clearance required [4] inset (if any)

(door thickness - backset)2 + clearance required + inset = hinge width

Thickness of Door (inches)	Clearance Req. (inches)	Open Width of Hinges (inches)
1-3/8	1-1/4	3-1/2
	1-3/4	4
1-3/4	1	4
	1-1/2	4-1/2
	2	5
	3	6
2	1	4-1/2
	1-1/2	5
	2-1/2	6
2-1/4	1	5
	2	6
2-1/4, 2-3/4	5	
	1-3/4	6
3	3/4	6
	2-3/4	8
	4-3/4	10

Selecting a Hinge

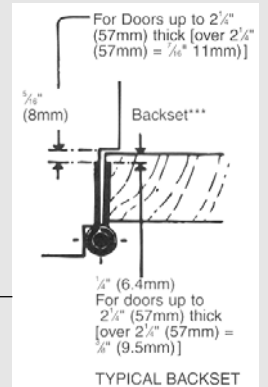

- 1** Most importantly, determine the material of the door and frame before selecting your hinges.
- Consideration should be given to each door's unique location. Conditions such as chemical laboratories, sewage disposal plants, etc., require special attention. While ferrous metal can be given a satisfactory rust-resistant base, it cannot be given the same absolute guarantee against rust as non-ferrous metals and should not be used in situations of extreme exposure.
- 2**
- 3** Loose joint hinges, paumelle, olive knuckle hinges, etc., are handed, and should be specified right or left hand.

- 4** Standard fasteners furnished with each hinge are specified in this catalog. Other fasteners are available and must be specifically requested.

- 5** Flat button tips are universally standard, with decorative tips and conversion kits available. Institutions often require hospital-type tips, where maximum security is desired.

- 6** The weight of the door and frequency of use determine whether a heavy weight, standard weight anti-friction bearing, or plain bearing hinge should be used. Heavy weight hinges should always be used on heavy doors and doors where high frequency service is expected. Use anti-friction bearing hinges on doors equipped with closers.

- 7** Raised barrel, electric hinges, pivot rein forced hinges, hinges with non-removable pins, security studs, etc., are also available.

Location of Hinges on Doors

Top hinge 5" from frame rabbet to top of barrel.

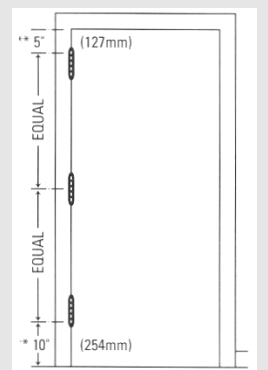

Bottom hinge 10" from bottom edge of barrel to finished floor.

Third hinge should be centered between top and bottom hinges.

The above is U.S. standard procedure.

Certain western states use as standard 7" (178mm) from top and 11" (279mm) from the bottom.

The suggested location for olive knuckle and paumelle hinges is 1/4" (6.4mm) from knuckle side of door to edge of hinge leaf.

How to Determine the Hand of a Hinge

The hand of a hinge is determined from the outside of the door to which it is applied. The outside of a cupboard, bookcase, or closet door is the room side. For other doors, the outside is usually the "push" of frame side or from whichever side security is necessary. If standing outside of a door which opens from you to the right, it takes right hand hinges. If to the left, it takes left hand hinges. Reverse bevel doors are doors opening out. It will be observed that this method of determining the hand of loose joint cabinet hinges is exactly the opposite from the furniture manufacturer's standard rule. To determine the hand of a loose joint hinge, open the hinge with its face towards you. If the knuckle of the right leaf is at the bottom, it is a right hand hinge. If the knuckle of the left leaf is at the bottom, it is a left hand hinge.

non-swaged

swaged

Swaging is the slight offset in the hinge leaves which permits them to close to a parallel position as the door closes.

All hinges for full mortise applications are swaged. Normal swaging on standard and heavy gauge hinges provides a clearance of 1.16" when the leaves are parallel. Full mortise wide throw hinges have a clearance of 3.32".

Hinges for full surface applications are not swaged. Blank hinges are for full surface welded application and are always furnished "flat back" unless specified otherwise when ordered.

BUTT HINGES

ACORN FULL MORTISE BUTT HINGES

Style 5514 Door Hinge - Standard Weight - Flat Button Tip

Smooth Iron. Template. B finish: Dull Black. Other sizes available. F.O.O. Items - Allow 2 weeks for delivery.

BALDWIN FULL MORTISE BUTT HINGES

Standard Weight 3"

Solid Extruded Brass - Standard Weight - 5 Knuckle

All hinges have a slight offset leaf which provides clearance of .062" (1.57mm) when leaves are closed and parallel. All hinges have template screw hole locations for use on either wood or hollow metal doors and frames. Pins are manufactured from precision ground, stainless steel material. All finials are threaded into the barrel of the hinge to prevent pin from rising. Finials are completely interchangeable with all full mortise hinge sizes. Furnished standard with solid brass Phillips head woodscrews, undercut, fully threaded to the head. Inner leaf is beveled to ensure tightest possible fit and enhance hinge appearance. F.O.O. Items - Allow 8 weeks minimum for delivery.

BUTT HINGES

STANLEY FULL MORTISE HINGES

179 USP

STANDARD WEIGHT - TEMPLATE - FLAT BUTTON

For doors of residences, apartment houses and other medium weight low-frequency doors. All hinges have template screw hole location for use on either wood or hollow metal doors and frames. Steel hinges are polished and plated to ensure a fine durable finish. Equipped with easily seated non-rising pins. Pins in nonferrous hinges are stainless steel. F.O.O. Items - Allow 2 weeks for delivery.

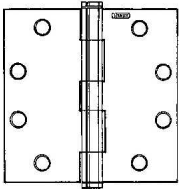

Steel hinges are furnished with all machine screws and all wood screws. Use three hinges per door. (Note: Use ball bearing hinges on high and average frequency doors, and all doors equipped with door closers.)

USP Only: (ANSI A8133) Fed. Spec. FF-H-16B, Type T2127. Steel - Polished and plated or phosphated and prime coated for painting.

BUTT HINGES

STANLEY FULL MORTISE HINGES

BB179 USP

STANDARD WEIGHT - BALL BEARING - FLAT BUTTON TIP

For Use on Medium Weight doors of average frequency.

All hinges have template screw hole location for use on either wood or hollow metal doors and frames. Equipped with two Stanley permanently lubricated non-detachable ball bearings. Steel hinges are polished and plated to ensure a fine durable finish. Equipped with easily seated, non-rising pins. Pins in nonferrous hinges are stainless steel. Steel hinges are furnished with all machine screws and all wood screws. Other finishes, sizes and wide throw available Factory Order Only. Use three hinges per door. (Note: Use ball bearing hinges on high and average frequency doors, and all doors equipped with door closers.) *F.O.O. Items - Allow 4 weeks.*

(ANSI A8112) Fed. Spec. FF-H-116B, Type T2107. Steel - Polished and plated or phosphated and prime coated for painting.

For non-removal pin list on separate line and add BHS NRP Charge #061-20800.

STANLEY FULL MORTISE HINGES

BB168 USP

HEAVY WEIGHT - BALL BEARING - FLAT BUTTON TIP

For heavy doors or doors where high frequency is expected, such as entrance doors to office buildings, stores, public buildings and corridor entrance doors to offices. All hinges have template screw hole location for use on either wood or hollow metal doors and frames. Equipped with four Stanley permanently lubricated non-detachable ball bearings. Equipped with easily seated, non-rising pins. Pins in nonferrous hinges are stainless steel. Steel hinges are highly polished and buffed, then plated to ensure a fine durable finish. Heavy weight gauges increase available bearing surface area for maximum friction reduction. Equipped with sleeve bearing for lateral support.

Steel hinges are furnished with all machine and all wood screws. Other finishes and sizes available Factory Order Only. F.O.O. Items - Allow 3 weeks.

(ANSI A8111) Fed. Spec. FF-H-116B, Type T2215. Steel - Polished and plated or phosphated and prime coated for painting.

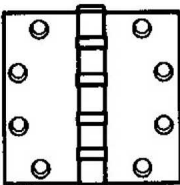

For non-removal pin list on separate line and add BHS NRP Charge #061-20800.

BUTT HINGES

STANLEY FULL MORTISE HINGES

BB199 US10

HEAVY WEIGHT - BALL BEARING - FLAT BUTTON TIP

For heavy doors or doors where high frequency is expected, such as entrance doors to office buildings, stores, public buildings and corridor entrance doors to offices. All hinges have template screw hole location for use on either wood or hollow metal doors and frames. Equipped with four Stanley permanently lubricated non-detachable ball bearings. Equipped with easily seated, non-rising pins. Pins in nonferrous hinges are stainless steel. Steel hinges are highly polished and buffed, then plated to ensure a fine durable finish. Heavy weight gauges increase available bearing surface area for maximum friction reduction. Equipped with sleeve bearing for lateral support. For non-removal pin list on separate line and add BHS NRP Charge.

Steel hinges are furnished with all machine and all wood screws. Other finishes and sizes available Factory Order Only. F.O.O. Items - Allow 4 weeks.

(ANSI A2111) Fed. Spec. FF-H-116B, Type T2112. Brass or bronze - Highly polished and finished. Stocked NRP Only. Packed 3 each per box with AMS and AWS.

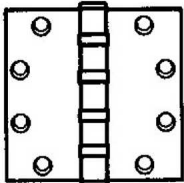

For non-removal pin list on separate line and add BHS NRP Charge #061-20800.

SOSS INVISIBLE HINGES ROUTER GUIDE TEMPLATE

Router guide installation templates are available for sizes 101, 103, 203, 204, 208, 212, 216, 218, 220 and 418. A perfect routed outline is foolproof (the only critical dimension is the depth of the shallow mortise), so you can expect a perfect installation every time. A router guide rail-system is now available for locking up to four router guides together for even faster installations.
